

PRODUCT DIRECTORY

SPLASH

the unique concentrate, safe, easy-to-use, vinyl application fluid for all grades of vinyl. Promotes faster adhesion, helps eliminate bubbles and wrinkles and is a good prep agent. An 8 oz. bottle dilutes with water to make one gallon. Formulated to make applying vinyl lettering, decals and graphics quicker and easier.

ACT-ON-TAG

"It's the BEST"
the ready-to-use application fluid for all grades of vinyl. An improvement over other ready-to-use application fluids. It is less aggressive and more efficient, resulting in stable, fast vinyl transfers. An excellent cleaner and prep agent. Will not attack transfer tape and cause separation. Pleasant vanilla scented. Supplied in gallon, quart, and 4 oz. bottles.

WINDOW JUICE

"APPLY IN MINUTES"
the first vinyl application fluid specifically designed for applying vinyl letters, decals and graphics to glass and windows. Fast, safe, simple and easy application. Works in extreme weather conditions: hot and cold, dry and humid. Available in quart and 4 oz. bottles.

GRAFX GONE

"Works FAST"
a less aggressive, non-corrosive, good smelling adhesive remover meeting all professional requirements. A mild, solvent based product. Makes the removal of any vinyl adhesive fast and easy. Requires no extra cleanup. Will not burn most plastics, even Styrofoam. Removes old paper sheeting from plastic. Available in quart and 4oz. bottles.

CLEARSHIELD

a state-of-the-art, water-based, highly flexible, ultraviolet protective clear coating suitable for use over most piezo, electrostatic, thermal, and pigmented inkjet output and other non-water sensitive systems. Provides enhanced exterior durability, chemical and abrasion resistance. Contains ultraviolet light stabilizers for maximum protection. Use on plastics, vinyls, and conventional rigid substrates such as wood, metal, and fiberglass. Application by brush, roller or spray. Available in gloss, semi-gloss and matte finishes in quarts, gallons, 5 gallons, and drums.

ClearShield - Type LL for use in automated laminating equipment. **ClearShield - Type C** for use on canvas and many micro porous ink jet receptive substrates. **ClearShield Type VG** – for use on vehicle graphics.

CLEARJET

a state-of-the-art, solvent based, highly flexible, ultraviolet protective clear coating for use over most pigment and dye based inks and water-sensitive inkjet media.

Provides enhanced durability, chemical, mar and abrasion resistance on a variety of media. Contains ultraviolet light stabilizers for maximum protection. Won't yellow. Available in gloss and semi-gloss finishes. **ClearJet - Type A2000** a no clean-up, 12 net oz. aerosol can. **ClearJet - Type BR** for brush and roll application in quarts. **ClearJet - Type S** ready-to-spray formula, in gallons. **ClearJet – Series FA Fine Art** – for sensitive canvas and fine art paper available in all versions.

JETSTAR

is the durable ink system for grand format printing. These non-clogging inks have the brightest, most permanent colors. Low square-foot cost. Easy to calibrate. Easy change-over from other ink systems. Full technical support. Custom formulations available. Currently available for Nur™, Scitex™, Arizona™ and Vutek™ printers.

Follow the star..... Clearstar, the standard for state of the art products in the digital graphics, sign, vehicle graphics and display industries. The future is here!
